**DETAILED ACTION**

1. This case has been reassigned to a new examiner.

***Response to Arguments***

2. Applicant's arguments, see remarks, filed 11/14/2007, with respect to the amended claims have been fully considered and are persuasive. The rejection of the claims has been withdrawn.

***Allowable Subject Matter***

3. Claims 1-2, 4-7, 10-20, 23-28, 30-32 are allowed.
4. The following is an examiner's statement of reasons for allowance: Applicant claimed receiving an incorrect URL, parsing the string of characters in the URL into parts, converting those parts into signatures based on the distance measure of closeness for a URL part in the first space is integer valued, parsing the characters in a second space to a closeness that is not integer valued, searching each part for valid URL parts using the signature of the URL part made with the distance measure of closeness, and one URL portion includes one or more non-text non-numerical characters. The prior art of detecting and correcting incorrect URLs fails to teach conversions based on a distance measure of closeness that is integer valued in a first space and not integer valued in a second space. Applicant's claimed invention is distinguished over the prior art based on the signatures of the URLs based on the distance measures of closeness in the first space and the second space.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
